

The intelligent, fast and simple way to deliver and manage apps on-premises and in the cloud

flexible IT® | APPS2DIGITAL

Apps2Digital, an evergreen application lifecycle management service, discovers, sizes, and automatically packages and deploys applications within organizations' existing distribution software platforms, to any cloud based or physical desktop infrastructure. This cloud service offers a clear and concise view of the application estate and allows IT to instantly understand, manage, categorize and deploy each application in the most effective way.

Transform apps in four simple steps

1 Discover

Download our Windows Endpoint Agent and discover all the apps in use across your organization

2 Assess

Create an inventory to determine app priority and a resource profile to size hosting requirements

3 Package

Automate app packaging with any platform and deliver to Windows Virtual Desktop or Citrix Workspace

4 Deliver

Deliver your packaged apps to any on-premises or cloud platform with total visibility and control

Where we help

Desktop Transformation

Systematic management and standardized app delivery for Citrix Workspaces

- Analyze and prioritize apps
- Package and automate app delivery
- Deploy across any platform, on-premises or any cloud
- Monitor and drive adoption of your virtual environment

Application Management

Keep control of your distributed and private cloud apps

- Understand usage and resources
- Determine potential security issues
- Remove non-compliant software (e.g. user installed)
- Report on EUC performance and experience

Disaster Recovery

Comprehensive app intelligence for DR planning and delivery

- Visibility of app locations and usage for DR planning
- Determine DR importance for all apps
- Standardize delivery of apps across any cloud provider
- Cloud provider cost monitoring

Mergers & Acquisitions

Smooth business integration and optimize app costs

- Size infrastructure and prioritize app integration
- Determine and consolidate app licensing
- Transition users seamlessly to new apps
- Enable business unit control of app resources

Why work with us?

We deliver a smart way to deploy, manage and support Citrix digital workspaces whether on-premises or in the cloud. We have the skills, knowledge and solutions to deliver the best digital workspace experience. Accelerate your transformation to the digital workspace with more control, less risk and complexity.
