10ZiG NOS™ Series Zero Clients for Citrix

The NOS™ Series Zero Clients for Citrix are designed to seamlessly interface with and support Citrix, leveraging the mobility and flexibility benefits of applications and desktop virtualization offered by Citrix XenDesktop and XenApp. As a long-standing partner in the Citrix Ready program, 10ZiG constantly strives to maintain its outstanding reputation for Citrix support. 10ZiG maintains a dedicated Citrix Ready team, which constantly monitors for new Citrix product releases and product upgrades. Each Citrix release and upgrade is evaluated for any impact to 10ZiG products, and any necessary supporting changes are made quickly, assuring that 10ZiG customers continue to enjoy flawless service from their Citrix solutions.

4448c *Value Class*

- Verified for Citrix HDX, HDX Premium, and optimized for Citrix XenDesktop HDX environments
- Intel 1.33 GHz Dual Core processor
- Dual Screen capability
- Optional External Wireless and VESA Mounting
- Ideal device for task users providing high performance multimedia acceleration

5848qc *Performance Class*

- Verified for Citrix HDX, HDX Premium, and HDX 3D Pro
- Intel Celeron 2 GHz Quad Core processor (2.42 GHz with Intel Burst Technology),
- Choice of Dual DVI or Dual DisplayPorts
- Ideal device for users requiring support for graphic intensive apps including 3D graphics/CAD/Full HD Multimedia and content rich browsing including HTML5/Flash based content
- Optional Internal Wireless and VESA Mounting

5948qc *Power Class*

- Verified for Citrix HDX, HDX Premium, and HDX 3D Pro
- 1.60 GHz Quad-Core Intel Pentium Proccessor N Series N3710 (with 2.56 GHz Burst Technology)
- Three monitor display all at 4K/UHD 30Hz or 2560x1600 60Hz
- 1 x HDMI + 2 x DisplayPorts
- Optional PoE, External Wireless, and VESA & ARM Mount
- Touch Technology capabilities with rotating base
- Ideal choice for power users requiring support for three simultaneous displays

10ZiG NOS™ Series Zero Clients for Citrix

HDX Premium Verification

Citrix certification for HDX Ready provides assurance that a device has met the stringent testing criteria specified by Citrix in demonstrating compliance with certification standards. HDX technologies extend the ICA protocol to satisfy modern demands for rich media apps. HDX also leverages innovations in endpoint computing power to deliver a high-definition experience for users. The umbrella of HDX features supported by 10ZiG includes Skype for Business and multimedia support, including video playback, both server and client rendered.
