

# A Revolutionary End-to-end Management Service for Digital Workspace Applications

The intelligent way to transform and manage apps for digital workspaces.

Our new service, Apps2Digital, delivers an intelligent way to transform and manage apps across multi-cloud digital workspaces. Come and speak to us to find out how to:

**Gather extensive insights** into your clinical and administrative computing environments

**Rapidly transform applications** to virtual environments with automated MSIX packaging and delivery

**Simplify** life-cycle management for all your applications

Apps2Digital provides a single place to manage all your clinical and administrative applications. Designed for Citrix Workspaces and integrated with Citrix Cloud, it provides a unified and systematic framework for delivery and lifecycle management of any app, whether located on-premises or in any cloud.

### Discover

Using our Windows Endpoint Agent discover all the apps in use across your organization

### Assess

Create an inventory to determine app priority and a resource profile to size hosting requirements

### Package & Deliver

Automate app packaging and deliver to any on-premises or cloud platform with total visibility and control
