

Process Fusion Healthcare Solutions

UniPrint Infinity - Healthcare Printing Suite⁺

Print Anything, Anywhere, Anytime

Despite all the advances in digitalization and imaging technology, printing continues to be a critical function for the healthcare industry. UniPrint's Healthcare Printing Suite (HPS) enables speedy, error-free, and on demand secure printing from major VDI & EMR applications (Citrix/EPIC), with 100% uptime. Comprising of 3 modules – Smart Route Printing, Smart Label Printing and High Availability, the platform can be built into any computing environment, and accessed on desktop, laptop or mobile devices.

CP-1 - eReferral Management⁺

Secure & Automate Your Processes

CP-1 is a universal document capture and processing solution that leverages AI to bridge gap between the digital and paper world, by converting multi-channel input documents into actionable data. This can then be easily verified and integrated into any ECM or ERP system.

About Process Fusion

UNIVERSAL ⁺

Process Fusion is a managed services and cloud application provider of Secure Information Exchange (SIX) and Business Process Automation (BPA) solutions that facilitates efficient, secure, and compliant delivery of information inside and outside of the enterprise.

Our input, processing, and output solutions are developed to work universally with any third-party vendor, regardless of the hardware, software or environment.

UNIFIED ⁺

We help automate critical business processes, increase process velocity, exchange information securely with high level of confidence while reducing as well as ultimately eliminating the inefficiency and errors associated with manual and labor intensive processes.

Our unified software platform provides organizations with a complete end-to-end solution for simplifying SIX and BPA.

UNIQUE ⁺

Our innovative solutions platform provides our users with a unique and simplified workflow automation experience that bridges the gap between the physical and digital world.

Our goal is simple. We help accelerate your manual business processes through automation and machine learning, making your document workflow smarter, simpler and more secure.

OUR MISSION ⁺

Our technology provides solutions to a wide variety of industries and a wide range of customers around the world. We recognize how important it is for organizations to secure and simplify their business processes, not just for the sake of compliance or efficiency, but to retain their clients trust and ensure they are fully satisfied and taken care of.
