Protect your Core Assets and PHI Anywhere

Gain Deep Visibility and Control, and Secure your VDI Environment Anywhere with Micro-Segmentation

Citrix Ready Partner Pavilion HIMSS'20

Enhance security for your IT infrastructure:

View, control and enforce how VDI hosts **communicate with internal resources** like domain controllers, DNS, DHCP, and Internet proxies

Eliminate lateral movement across a heterogeneous environment that includes VDI

View, control and enforce how VDI Users **connect to applications across the hybrid cloud**

Demonstrate and achieve hard to implement **compliance mandates**

Enjoy quick time to value for **visibility, protection and incident response**

Guardicore and Citrix, better together!

- Eliminate lateral movement across a heterogeneous environment that includes VDI

- Benefit from Advanced User Identity Access Management across a hybrid cloud and on-premises data center

- Reduce VDI risk, minimize attack blast radius and gain deep visibility to reduce response time

100 percent of web applications that are connected to critical health information are **vulnerable to cyber-attacks**, with none found to be secure. Network penetration results also showed that hackers could easily access domain level admin privileges of the majority of healthcare applications.

At the Guardicore HIMSS'20 pod, visitors can:

- Learn how to effectively create and enforce policies that isolate Citrix Virtual Apps and Desktops securely

- Understand how a zero trust approach can be used to prevent unauthorized access and lateral movement

- See the ways that Guardicore Centra's micro-segmentation capabilities integrate with critical Citrix technologies, enabling customers to maximize their existing investments while transforming security in the cloud and hybrid data center
