

# IGEL OS: The Next-Gen Edge OS for Healthcare Cloud Workspaces

Turn any compatible x86 device into a secure, compliant healthcare endpoint

IGEL OS is the preferred endpoint OS for healthcare:

- 
**Platform-independent** – secure and optimize *your* user devices
- 
**Well protected** – Read-only, modular, and minimal footprint
- 
**Trusted** – “Chain of trust” ensures system-wide integrity
- 
**Supports all** popular healthcare systems, devices, and interfaces

IGEL and Citrix optimize healthcare IT and offer a great user experience.

- 
**IGEL OS stays current with Citrix Workspace App**
- 
**IGEL and Citrix help enable HIPAA compliance**
- 
**Extreme savings:** Hosted apps & desktops, software-defined endpoints
- 
**Broad integration with healthcare apps,** EMR, interfaces, peripherals
