

# Protect your Core Assets and PHI Anywhere

We Provide End-To-End Solutions Health Care Providers Can Count On!

Citrix Ready  
Partner Pavilion  
HIMSS'20

StarDaaS™ provides end-to-end productivity features including cloud-optimized virtual apps and desktops, storage, and anywhere, anytime access with any internet-capable device. Health care providers can realize these unique benefits:

- 

Ultimate flexibility with the ability to **access mission-critical documents and communications tools** through a secure portal via their smartphone, tablet, laptop, desktop computer, or other internet-capable device
- 

Ability to **customize their virtual workspace** with applications specific to the health care industry through custom development and integration services
- 

**Built-in security features** keep confidential health data safe using cloud storage, multi-factor authentication, encryption, and context-based access controls to reduce risk of intrusion and eliminate VPN holes without compromising ease of experience

Our relationship with Citrix has allowed us to:

- 

Offer a Citrix Ready verified UCaaS platform on the market
- 

Streamline users' workspace environments with secure virtual apps, desktops, and Unified Communications tools that other providers cannot match
- 

Leverage the power, consistency, and security of the Citrix Cloud and workspace environment
- 

Customize virtual workspace solutions to suit the needs of every business and vertical

## At HIMSS'20, join us to witness

- 

The advanced features and benefits of the industry's only Citrix Ready UCaaS platform, StarDaaS™
- 

Learn about our experience in the Health Care industry and how we provide leading communications solutions for hospitals, doctor's offices, assisted living facilities, and more
