Magnifier and screen reader for remote access across Citrix and Remote Desktop Services

## FEATURES:

- Magnification, speech, screen reader and braille display support
- Deploy a single product for ALL your visually impaired team members
- Includes remote access for installations via RDS and Citrix networks
- Access to local and remote networks, thick and thin clients
- Unlock and activate the remote product for use on all workstations
- Flexible licensing based on number of users, not workstations

## CITRIX:

- XenApp 7.x (*older versions may also work*)
- XenDesktop 7.x (*older versions may also work*)

## REMOTE DESKTOP SERVICES:

- Microsoft Windows 2008 and 2012 R2 64bit Servers.

## LOCAL INSTALL OR VIRTUAL MACHINES RUNNING:

- Windows 7
- Windows 8.1
- Windows 10

 **Dolphin**  
Assistive technology for life

## Magnification, Speech & Braille

Accessibility for every visual impairment thanks to:

- 1.2 to 64 times magnification
- 24 high contrast colour schemes
- High-Vis mouse pointers
- Multiple monitor support
- Human sounding speech
- Full screen reader
- Over 60 Braille displays supported

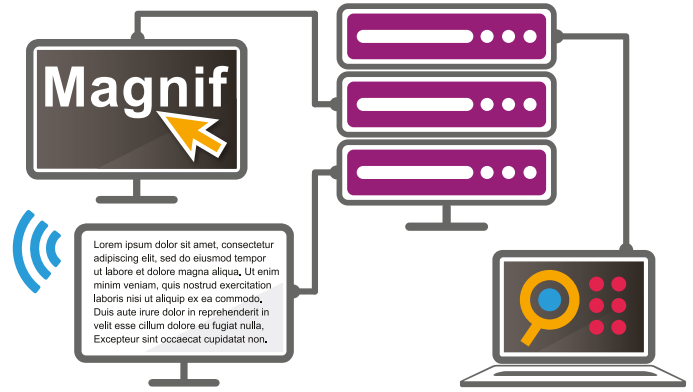

## Cost Effective

One solution for all visual needs:

- Licensed by user, not by device for both central and remote locations.
- Includes 12 month software maintenance agreement (SMA) with option to renew annually.
- Direct access to Dolphin's 1st line product support team, as well as advanced support tools for troubleshooting.

**“The installation of Dolphin’s solution is transparent, which enables us to reassure Citrix administrators who are initially sceptical about a server installation.”**

René Schneider,  
Accesstech AG, Lucerne,  
Switzerland

## Always Responsive

- Responsive and accurately tracks your clients' mouse and keyboard, thanks to server installation accessed through Citrix or Remote Desktop sessions.
- Bandwidth usage is optimised as all speech audio is generated on the client machine and is not streamed across your network.

## Centrally Managed & Maintained

SuperNova Enterprise has been designed to simplify deployment and management in professional multi-user environments:

- Unlocks all editions of SuperNova & ScreenReader and deploy the edition to suit your clients' needs.
- Configure to work with your Citrix published applications and published desktops.
- One step unlock and activation - no need to authorize each individual workstation.
- Administrator utility facilitates deployment options, including: start-up, diagnostic information and enabling/disabling modules to suit your IT policy.
