CITRIX® Ready

Magnifier and screen reader for remote access across Citrix, VMWare & Remote Desktop Services

- Accessibility accommodation and compliance for vision impaired end users

- Deploy a single product for ALL your visually impaired team members

- Includes remote access for installations via RDS, Citrix and VMWare networks

- Access to local and remote networks from thick and thin clients

- Unlock and activate the remote product centrally for use on all workstations

- Flexible licensing based on number of users, not workstations

CITRIX:
- XenApp 7.x *(older versions may also work)*
- XenDesktop 7.x *(older versions may also work)*

VMWARE CLIENTS:
- VMWare Horizon Client 3.5, 4.10 (x86 and x64) and later

REMOTE DESKTOP SERVICES:
- Microsoft Windows 2019, 2016, 2012 R2 and 2008 R2 64bit Servers.

LOCAL INSTALL OR VIRTUAL MACHINES RUNNING:
- Windows 7, Windows 8.1 and Windows 10

Dolphin
Making a difference

Magnification, Speech & Braille

Accessibility for every visual impairment thanks to:

- 1.2 to 64 times magnification
- 24 high contrast colour schemes
- High-Vis mouse pointers
- Multiple monitor support
- Human sounding speech
- Full screen reader
- Over 60 Braille displays supported

Cost Effective

One solution for all visual needs:

- Licensed by user, not by device for both central and remote locations.
- Includes 12 month software maintenance agreement (SMA) with option to renew annually.
- Direct access to Dolphin's 1st line product support team, as well as advanced support tools for troubleshooting.

Always Responsive

- Responsive and accurately tracks your clients' mouse and keyboard, thanks to remote installation accessed through Citrix, VMWare or Remote Desktop sessions
- Bandwidth usage is optimised as all speech audio is generated on the client machine and is not streamed across your network.

> "The installation of Dolphin's solution is transparent, which enables us to reassure Citrix administrators who are initially sceptical about a server installation."
>

Centrally Managed & Maintained

SuperNova Enterprise has been designed to simplify deployment and management in professional multi-user environments:

- Unlocks all editions of SuperNova & ScreenReader and deploy the edition to suit your clients' needs.
- Configure to work with your published applications and desktops.
- One step unlock and activation – no need to authorize each individual workstation.
- Administrator utility facilitates deployment options, including: start-up, diagnostic information and enabling/disabling modules to suit your IT policy.
