

# Slow Apps or Desktops? See, Solve & Prevent, with eG Enterprise.

Ensuring great Citrix user experience with end-to-end monitoring and auto-diagnosis

## Product Features

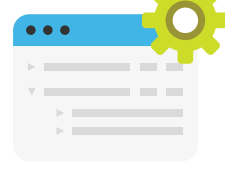

eG Enterprise is a comprehensive, end-to-end Citrix performance monitoring, diagnosis and reporting solution for any size and type of Citrix deployment. With eG Enterprise you can:

Monitor all aspects of Citrix user experience

Automatically diagnose performance problems wherever they occur

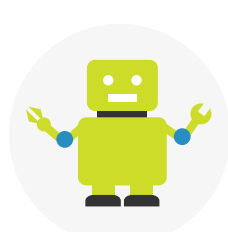

Plan, optimize and right-size infrastructure using built-in reports

## Key Product Differentiators

eG Enterprise provides single-pane-of-glass visibility to monitor all the Citrix tiers as well as the underlying infrastructure supporting them with correlated insights.

Identify network, storage, virtualization issues affecting Citrix performance

Troubleshoot faster with automatic event correlation and root cause diagnosis

Auto-baseline every layer, every tier to proactively detect issues

Get actionable insights and recommendations using embedded domain expertise

## Key Industries

Through unified IT monitoring, deep Citrix performance visibility and virtualization-aware auto-diagnosis, eG Enterprise helps organizations of all types get the most out of their technology investments, including healthcare, financial services, insurance, education, retail, and service providers.

### Healthcare

Ensure excellent patient care through continuity of service and simplify reporting for compliance

### Financial Services

Ensure maximum productivity for enterprise end users, simplify reporting for compliance, and increase IT ROI

### Managed Service Providers

Enable accurate performance assessments, fast troubleshooting and data-driven client recommendations
