

Simple, Secure, Centralized Endpoint Management for Education

Reduce IT Cost and Complexity with IGEL

Citrix Ready
Partner Pavilion
EDUCAUSE 2018

booth
#413

Empower your organization's IT infrastructure

- ✓ IGEL UDC and UD Pocket enable the repurposing of older hardware to **one** standard, secure OS, for **all** x86 devices (64-bit with 2Gbytes of RAM)
- ✓ Migrate to Windows 10 on **any** compatible x86 device without expensive hardware upgrades at the endpoint
- ✓ Central management enables **fast** and consistent reconfiguration of devices for lessons and exams, for locked-down and fully controlled student endpoints

Regardless of the scale or diversity of your educational environment, IGEL can help sharply lower endpoint complexity and cost while improving security.

- Supports multiple versions of Citrix Receiver in a single device
- Ensures class-, campus-, or system-wide endpoint compliance and student privacy
- Remote management for 10,000 devices is as easy as for 10
- Fully embedded support for single sign-on solutions, smart card readers, secure shadowing and more

Salem State University reduced user logon times to less than **30 seconds** with IGEL

Montessori School of San Antonio sees a more than **60% savings** in energy use with IGEL thin clients

Longview Public Schools saves up to **30 minutes** per endpoint using IGEL automatic configuration

Ayshire College achieves quick, instant access to **Citrix Virtual Desktops** with IGEL
