Enhance Citrix XenApp and XenDesktop User Experience with UEM, Application Layering and Granular End-User Monitoring

Liquidware Labs™ provides comprehensive User Management and Monitoring in one convenient suite known as Essentials. This bundled solution is comprised of ProfileUnity™ with FlexApp™ for User Environment Management and Application Layering and also includes Stratusphere™ UX for superior Visibility of User Experience metrics across any Windows® desktop, including Citrix® XenApp and XenDesktop.

This bundle delivers user and application management to enable efficient delivery of the user persona and selected applications based on policies. This approach allows for the best desktop experience anytime, anywhere and on any device. Leveraging the Liquidware Labs Essentials bundle reduces infrastructure and user-management costs while improving user experience and flexibility in Citrix environments.

“Customers looking for Citrix-Ready certified User Environment Management, Application Layering, and added User Experience Visibility will find great value in Liquidware Labs Essentials bundle. This set of solutions include specialized features expressly made to support Citrix XenDesktop and XenApp environments. Our mutual customers will gain additional options to rapidly on-board users, deliver applications, and grow and scale their deployments while ensuring a quality user experience.”

Siddharth Rabindran
Senior Manager, Citrix Ready at Citrix

User Environment Management
ProfileUnity delivers full-featured User Environment Management that includes superior Profile Management, and Centralized Policy Management that goes beyond Microsoft® Group Policies, as well as advanced features such as Privilege Elevation and Application Rights Management.

Application Layering
FlexApp is an integrated part of ProfileUnity, offering Administrator-assigned Application Layering with optional User Installed Application Layering features. Even complex apps can be assigned on a machine level, per user, group, or context-aware basis. The solution is compatible with virtually all desktops, including Citrix XenApp and Microsoft® RDSH.

Visibility
Stratusphere UX provides industry-leading in-guest metrics that help you head off issues before they become mission-critical show stoppers. The solution supports all platforms and delivery approaches to provide success and minimize risk in all phases of the transformation lifecycle — from assessment and onboarding to proof-of-concept (POC) and pilot, and finally to production.

• One user profile across VDI, RDSH, DAAS & physical desktops
• Up to 10x faster logons vs. roaming profiles
• Application and user rights management
• Location/context-aware policy and profile capabilities
• Automated migration to Windows 7/8.x & Server2008/12r2

• Reduce the number of images to manage
• Deliver applications on-demand
• Persistent user-experience on non-persistent infrastructure
• Provision application volumes as VHD or VMDK

• User-experience monitoring
• Diagnose root causes of issues and bottlenecks
• Optimize resource capacity and performance
• Grow and scale Citrix XenApp and XenDesktop environments
**About Citrix Ready**

Citrix Ready identifies recommended solutions that are trusted to enhance the Citrix Delivery Center infrastructure. All products featured in Citrix Ready have completed verification testing, thereby providing confidence in joint solution compatibility. Leveraging its industry leading alliances and partner eco-system, Citrix Ready showcases select trusted solutions designed to meet a variety of business needs. Through the online catalog and Citrix Ready branding program, you can easily find and build a trusted infrastructure. Citrix Ready not only demonstrates current mutual product compatibility, but through continued industry relationships also ensures future interoperability.
