

CHAT ENABLED COLLABORATION – WHEREVER YOU GO!

MindLink Mobile brings highly secure messaging & collaboration on to mobile devices and tablets for iOS, Android and Blackberry. Searchable, persistent, real-time - MindLink enables teams to share information and knowledge across the firm, significantly reduce Email volumes and improve team & project work.

The result: A collaborative enterprise that drives efficiency and productivity through better internal communications – in the office and on the go!

Key Benefits

- Connect your remote & distributed teams
- Reduce Email Volumes & Information Overload
- Distribute critical knowledge across the business - fast
- Build a searchable knowledge repository – all information shared is indexed and preserved
- Reduce meeting & travel costs

“We use MindLink a lot! Our users love it. Features such as the ‘LiveStream’ & the availability on browser and mobile enable our IT operations to be more agile”

The Institutes

MindLink Mobile - that's:

- Presence - your availability
- Instant Messaging - ad-hoc conversations
- Group Chat - standing chat rooms
- File Sharing & Archiving
- Integration with Lync or Skype for Business
- Voice Calling (coming soon)
- Integration with Email, Social Media, Portals & any internal system

Share Information with Peace of Mind:

- Enterprise-grade Mobile Data Security
- Flexible Deployment Model (On Premise & Cloud)
- Compliance Modules
- MDM/ EMM Support for all major mobile device management tools: BlackBerry, Good Technology, MobileIron, Citrix, The Sector Network and more

MindLink Productivity Features:

- Livestream
- Alerts & Notifications
- #Hashtags & @Mentions
- Advanced Search & Filters
- Secure Guest Access

MindLink Mobile is fully integrated into your existing business systems & processes through our connectors and smart integrations - providing you with information from numerous sources right within your chat rooms.

MindLink is a highly secure Chat Enabled Collaboration (CEC) platform for enterprises. Its messaging & collaboration app encourages employees to stay connected, reduce Email usage and build a more agile business. It provides mobility, security, compliance and advanced integration whilst connecting to UC platforms such as Microsoft Lync & Skype for Business.
