

Improve Efficiency –
Save Money

Powerful inside, tough outside.

- ⊕ Mobile and flexible data security for highest demands
- ⊕ Customizable workflow for improved document creation
- ⊕ Dictate with ease
 - Simple one thumb operation
 - Editable audio files

DS-Series

⊕ Enjoy single handed operation with the ergonomic slide switch.

⊕ Enhanced microphone excels in speech recognition.

+ Keep your eyes on the job.

Enjoy single handed operation with the ergonomic slide switch.

Decades of voice recording have proven that the slide switch makes recording comfortable and fast. The ergonomic slide switch is an excellent, classic user interface that allows single-handed and blind operation.

+ Far more than just a recorder.

The DS-Series empowers you with a whole range of editing options.

Creating texts by merely speaking is more than just recording. The digital speech standard (DSS) allows for quick file editing (insert, overwrite, append, erase/cut) and uses meta information (index, verbal comments, worktypes, etc.) to facilitate collaboration and automatic processing.

+ Powerful inside, tough outside.

The DS-Series is built to withstand heavy-duty usage over long periods.

As well as being ergonomically designed to fit perfectly in your palm and ensure comfortable operation for up to several hours at a time, its housing is also built from tough metal to withstand even the toughest of working conditions in the long term.

+ Speech-optimised microphone for dictations.

Work with a microphone that excels in speech recognition.

The outstanding 10-mm microphone and the DSS Pro audio codec are excellent for speech recognition and transcription performance. This has been certified by Nuance with 6 Dragons for maximum accuracy.

+ Connect – charge – transfer with ease

Do even more with the docking station

You can even link it up to an optional foot pedal or hand controller allowing to remote control recording or playback.

+ Professional dictations meets confidentiality

Several security features keep your data confidential

Dictations are 256-bit AES encrypted in real-time, the device can be locked with a 4-digit PIN, each user/author can have his individual password. If desired, the optional Data Loss Prevention (DLP) mode restricts the users to copy files from the computer to the dictation device.

The DS-Series at a glance

MAIN FEATURES	DS-7000	DS-3500
Slide switch for single handed and blind operation	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Button operation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
