# STRONGKEY

## MAKING FIDO ACCESSIBLE TO ORGANIZATIONS OF **ALL SIZES.**

StrongKey has been committed to the FIDO cause since 2014, and builds the world's only **open source** FIDO Certified FIDO2 Server (check out our GitHub and SourceForge pages!)

We are constantly adding no-cost features that enterprises actually need, and **never charge** per-transaction or per-user fees.

Whether you are just beginning your FIDO journey, or have a solution already in place, we are confident that we can deliver better **security**, better **affordability**, and more **flexible** integration.
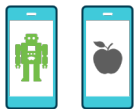

## HIGHLIGHTS

**Open Source** version available for startups/POCs

Enterprise deployments use purpose built **cryptographic hardware** (TPM or HSM)

**Apple** and **Android** libraries/demo apps available

**Flat pricing**: no per-user or per-transaction fees

**fido** CERTIFIED

**csa** connectivity standards alliance
