#527**

HELPING ENHANCE YOUR HEALTHCARE IT SETUP

- ✓ **Capture clear, crisp** handwritten electronic signatures using digital ink
- ✓ **Interactive displays** enable patients to review, annotate and sign documents on the same screen
- ✓ **Show patients customized** messages and videos when you're not signing
- ✓ **Durable, long-lasting** signature devices without batteries or pen cables

CAPTURE ELECTRONIC SIGNATURES WITH WACOM

-  Sleek, space saving designs are perfect for crowded reception desks
-  Scratch resistant, anti-glare screens are easy to read in any light
-  Wide range of signature hardware that supports XenApp 6.5 and later

 Reduced patient registration time up to **75%**

 Achieved a **60%** increase in patient load

 Reduced per patient processing costs by **75%**

 Reduced paper consumption by **51%** within 6 months

At HIMSS'19, join us to:

- ✓ Try a Wacom pad for yourself – get your hands on our range of signature pads and pen displays and see for yourself why so many people prefer Wacom
- ✓ See a live demo of our new DTH-1152 pen and touch display running on a Citrix virtual desktop
- ✓ Get a copy of the joint Citrix/Wacom White Paper – How to (Finally) Get a Paperless Medical Workflow
