wandera

Data management:
The richest insights
The most powerful policy

While mobile has transformed the workplace for the better, it has also created new and difficult challenges for IT leaders. Wandera offers a solution that enables productive mobile working, while alleviating concerns around growing costs, access to inappropriate content and shadow IT.
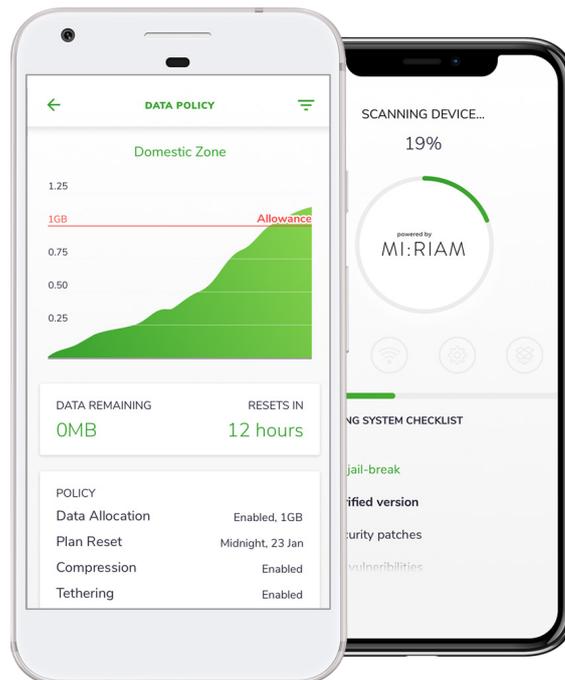

Manage rising costs

Analyze usage

Get detailed usage reports on work devices and corporate data, encompassing both roaming and Wi-Fi.

Control consumption

Use flexible filtering, capping and compression features to keep data usage manageably small.

Eliminate overages

Prevent unexpected charges at the end of your billing cycle by implementing sensible policies.

Enforce acceptable use

Ensure compliance

Enforce your corporate usage policies, filtering content deemed inappropriate for work.

Segment personal use

Work devices are regularly used for personal use. Wandera helps you define and understand the split.

Limit your liability

Avoid HR or legal implications arising from employee activity on business-assigned devices.

User-centric technology

The Wandera solution includes an application installed on work-assigned devices, designed to give end-users insights and customizable notifications on their own data usage. This helpful and intuitive app can operate in the background, and doesn't even need to be open for Wandera to function.

DLA PIPER

"We have come to a point where our monthly bills have almost flatlined and can predict month-to- month what the mobile bill will be, regardless of who's travelling and what they are doing. That's never happened before."

30% DATA SAVINGS

Unparalleled visibility

Wandera is the only technology able to scan traffic in real-time, with data vectored through Wandera's web gateway for mobile without any latency or battery degradation. This means data can be analyzed as it is used, with filters, caps and controls implemented as the data is in transit.

DEVICE → WEB GATEWAY FOR MOBILE → INTERNET

APPS + WEBSITES
See not only which apps are being used and when, but also get visibility into what's happening in the browser.

CELLULAR + WIFI
Get granular insights into online activity, whether they're on a 4G connection or any kind of WiFi hotspot.

ROAMING + DOMESTIC
Create context-sensitive reports and policies that differ depending where in the world each device is.

ADMINS + EMPLOYEES
Create alerts, notifications and reports for both employees and admins, all of which can be anonymized.

Seamless deployment

Wandera is integrated with every major EMM platform, meaning getting Wandera deployed to your entire fleet is both simple and effortless. Enrol thousands of devices in minutes, with zero input from end-users.

vmware airwatch | BlackBerry | CISCO | IBM | SimpleMDM

jamf | Microsoft | MobileIron | SAP | CITRIX

Trusted by the enterprise

500+ enterprise deployments

ZURICH | EY | DLA PIPER | Bloomberg | Deloitte.

NATO OTAN | mastercard | Santander | mazda | Office DEPOT What you need. What you need to know.

wandera

Wandera is the global market leader in enterprise mobile security, delivered through its pioneering web gateway. Providing maximum visibility into mobile data, Wandera goes beyond threat detection to prevent attacks and contain data leakage. The solution's threat intelligence is powered by MI:RIAM, a real-time security engine that analyzes the industry's largest mobile dataset to uncover new vulnerabilities and zero-day threats as they emerge.
