wandera

Mobile security:
The deepest visibility.
The most powerful defense.

All security strategies start with visibility. It is a critical component in identifying unwanted risk and dealing with threats as they emerge. It should be no different with mobile, which is why Wandera has been built to give you the visibility you need to protect your devices.
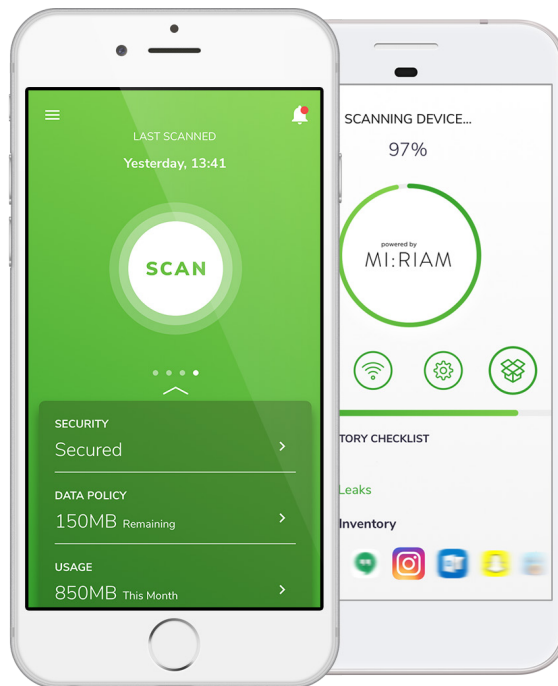

Reduce your risk

Detect vulnerabilities

Discover risky configurations in each device, such as an outdated OS or evidence of a jailbreak.

Uncover data leaks

Real-time scans help you find leaky sites and apps, blocking potential data breaches at the source.

Employee misuse

Monitor and enforce policies that prevent shadow IT, block access to risky content and stop rogue file-sharing.

Defend against threats

Prevent the attack

With access to the network itself, threats like phishing attempts and malware can be intercepted before they even reach the target.

Detect the threat

Using real-time behavioural analysis, even undiscovered, zero day threats can be identified on infected devices.

Contain the damage

Once a device is compromised, stop attackers from exerting remote control and block the data from exfiltration.

TULLOW Oil plc

"It's a no-brainer to use Wandera for security. Without it, we don't know what we're exposed to. With it, we can see exactly where our devices are vulnerable and which threats are attempting to compromise them."

"The signs are clear that mobile threats can no longer be ignored. Security and risk management leaders must familiarize themselves with mobile threat defense solutions and plan to gradually integrate them to mitigate mobile risks."

Gartner®

Unparalleled visibility

Wandera is the only technology with visibility of the device and the networks it connects to. This means risks can be eliminated in real-time, and threats can be intercepted before they even reach the device.

DEVICE PROTECTION	NETWORK PROTECTION	INTERNET

Largest data set

This unmatched visibility generates huge volumes of data. MI:RIAM, Wandera's security engine, analyzes more than a billion data points every single day. Powered by machine learning, MI:RIAM regularly uncovers new strains of malware and zero day threats as they emerge.

DATA	MI:RIAM MACHINE LEARNING

Powerful ecosystem

With more EMM and SIEM integrations than any other mobile security vendor, Wandera is designed to work in tandem with your existing technologies.

10+ mobility integrations

10+ security partnerships

4+ platforms supported

vmware airwatch · Mobile Iron · MaaS360 · splunk> · paloalto networks · IBM QRadar · android · Apple · Microsoft · SAMSUNG
