

ShutdownPlus® Rolling Restart™

“With something as sensitive as Citrix server restarting, I prefer a tried and tested tool, ShutdownPlus Rolling Restart.”

– Byron, ISP Hosting Manager

“I will always choose a company with a fully supported software product for my terminal servers over any script. And your support is fantastic.”

– Thomas, City IT Manager

“We have too much invested in our terminal sever environment to trust anything else. ShutdownPlus Rolling Restart has been our choice for many years and I highly recommend it.”

– Jonathan, Hospital IT Director

“ShutdownPlus Rolling Restart saves us from getting a 3AM call about a Citrix server issue caused by being un-rebooted for weeks and has degraded seriously since. It keeps our Citrix farm healthy by re-booting our servers while everyone sleeps. Thanks again and keep up the good work.”

- Marek, Law Firm IT Manager

real software solutions for **IT**

ShutdownPlus® Rolling Restart™

Silently, Centrally, and Reliably Restart VMs, Terminal Servers, Standard Servers, and Desktops

BENEFITS

- An automated and centralized restart solution for Windows terminal servers, servers, and desktops.
- Organize computers into multiple groups with their own restart schedule.
- Fail-safe restarting.
- Eliminates babysitting server restarts when done manually or using a script.
- Low startup cost of around \$40 per server, depending on quantity.
- Removes inherent risks of using free-ware restarting scripts.
- Entrust the hundreds of thousands of dollars your company has spent on its server infrastructure and line-of-business apps with a backed and supported software product, not a script!

All companies make significantly large investments in VDI/terminal server infrastructure, and only professional software can ensure that it remains running with optimal availability. For over 13 years, companies worldwide have trusted ShutdownPlus Rolling Restart to protect their investment. At the software's core resides our patent-pending rolling restart algorithm.

This algorithm also contains technology to ensure no end-user impact, with user load maintained across all systems during restarts and without interruptions of any kind. The software seamlessly integrates with all 3rd party load balancing software. GUI central management gives control to the administrators by placing servers in groups, with each group having its own restart type, schedule, and even its own timeframe. The software has built-in fail-safe measures with automated notifications.

Additional Features

The unique Silent Mode feature in ShutdownPlus Rolling Restart means server restarts do not affect end users at all. No notifications or sessions suddenly ending.

Some servers need their services stopped in a particular order, and only if those services successfully stop should the server get restarted. ShutdownPlus Rolling Restart also takes care of this.

Restarts are automatically stopped if a problem arises. Custom commands can be run, and profiles and printer spooler files can be cleaned.. Any Windows operating system (XP through 2008 R2) can be restarted by a central console running ShutdownPlus Rolling Restart.

CLOUD

Keeping virtual desktops and servers up and running is key to delivering solutions to end users and customers. ShutdownPlus Rolling Restart helps keep your virtual environment up and running. And being Microsoft, Citrix, and VMware partners allows us to ensure our software works in these VM environments.

With over 13 years of worldwide systems experience under its belt, you can trust its reliability and thoroughness. Download a free 21-day evaluation of ShutdownPlus Rolling Restart and find out what successful companies already know.

Our software helps companies worldwide by decreasing support costs and increasing uptime and reliability.

Our solutions target problems that exist everyday within all organizations, regardless of size, industry, or location. From Fortune 500 companies, to small companies and home users, our software saves money, increases ROI, saves time, and helps the environment.

You can evaluate our software free of charge during its evaluation license period. When you are ready to purchase, you can do so online, through your salesperson, or through one of our 100+ resellers in over 15 countries. See how our software can provide your company real solutions that work.
