

Unigy Soft Client[®]

Is now Citrix Ready

Today's traders demand mobility. Trading firms need to have the ability to trade anytime, anywhere, from any device – in a secure and compliant manner. This is an enormous competitive benefit in an uncertain and ever-shifting environment.

Unigy Soft Client

Unigy Soft Client provides users with the same functionality, consistency and flexibility that is expected from Unigy, regardless of location, device or application. The application can be rapidly deployed and delivers powerful features with the same intuitive look and feel as the end user interface of the IQ/MAX Touch financial terminal. Traders and other regulated users can have the same experience virtually at home as they do physically in the office.

Citrix Ready

Unigy Soft Client is also **Citrix Ready**, supporting virtual desktop infrastructure (VDI) deployments. Citrix, a platform that brings intelligence, virtualization, workspace and app delivery, a zero-trust security approach, and data analytics together into a seamless experience that integrates with the Unigy Soft Client. With IPC's Citrix Ready Soft Client, traders and all regulated users will be able to:

- Access their office work environment from anywhere using a virtual desktop infrastructure – no VPN needed
- Leverage a world class unified communication solution created with today's evolving trading needs in mind
- Switch seamlessly between a turret and a soft client on a laptop or desktop device
- Do their best work with a seamless workspace experience using a soft trading platform flexibly deployed, managed and maintained from a centralized infrastructure

"Today's employees spend more time than ever working remotely, causing companies to rethink how IT services should be delivered. To modernize infrastructure and maximize efficiency, many are turning to desktop as a service (DaaS) to enhance their physical desktop strategy, or they are updating on-premises VDI deployments. Managed in the cloud, these deployments are high-performance virtual instances of desktops and apps that can be delivered from any datacenter or public cloud provider" **Citrix**

Features

PC-based soft turret

Access can be obtained using Internet
– VPN access can be optional

Citrix Ready VDI support

- Soft Client can be accessed via the Citrix virtualization from anywhere

Full Blue Wave[®] API Support

Up to 18 VR streams
