Stratodesk NoTouch OS
The Booster Shot for Your Healthcare Endpoints

How Stratodesk and Citrix enable a secure, managed, and cost-efficient remote workspace

Stratodesk provides the premier lean, secure endpoint operating system that gives healthcare professionals easy and fast access to their Citrix Workspace and other virtual/cloud environments

stratodesk

Scalable and simple endpoint management across multiple devices and locations frees up IT staff

Small footprint, minimal attack surface Linux OS for improved security

Meet your business requirements anytime with flexible licensing options (monthly/yearly subscription or perpetual)

Enriched user experience through the integration of critical technologies: SSO (Imprivata ProveID), smartcards, dictation, imaging as well as apps like Cerner, EPIC and other EMR systems

For decades, Citrix and Stratodesk have been working together to solve common obstacles in healthcare IT. Stratodesk NoTouch OS is the ultimate solution for the clinical endpoint. Together with Citrix Workspace, they provide a VDI or DaaS solution that allows healthcare professionals to be more efficient and productive with an improved end-user experience.

01 Stratodesk NoTouch OS is validated as Citrix Ready Endpoint at Premium level for Citrix Virtual Apps and Desktops and Citrix DaaS

02 Stratodesk NoTouch OS has "Day One" Support for the Citrix Workspace app

03 Stratodesk NoTouch OS supports Citrix HDX 3D Pro for a better user experience in graphic -intensive apps, and supports optimization for Microsoft Teams

Stratodesk reduces PC replacement budget in a typical healthcare environment by **40%**

Stratodesk saved 13 weeks of IT technician per year and **$30K** from repurposing laptops

Stratodesk rolled out **10K** endpoints in only a couple of weeks

At HIMSS23, join us to witness the most **powerful healthcare IT endpoint solution** in the market

Key activities or announcements at your pavilion pod:

Ask us about NoTouch Flex! Industry's first all-in-one SaaS offering that delivers cloud-hosted management of endpoints: no upfront capital investment, flexible monthly or annual licensing
